(54) A queue manager for an electronic mail system having improved reliability and improved adaptability to resource constraints.

(57) A queue manager for controlling the execution of requests for the transport of messages from users to destinations. Each request includes a message and an identification of a destination. The queue manager includes a queue for storing pending requests and a

dispatcher task for creating a worker task to execute each request and provides a method for adapting the execution of requests to constraints and characteristics of destinations and communications links.
